Specialty Rental Operating Benchmark

SUBVERTICAL LENS

Consumer storage, B2B storage, modular space and trench safety differ in rental duration, service intensity and capital recovery. Simple standardized assets generally support stronger margins and conversion, while modular and project-driven fleets carry greater reset or utilization risk. [DR pp. 28-34]

METRIC	ESTIMATE	ASSERTION	CONFIDENCE
Revenue growth	Consumer **Not estimated**; B2B storage **5%**; Modular **6%**; Trench **6%**	Consumer storage is not estimated because PODS lacks a clean organic growth bridge. B2B storage is anchored to Mobile Mini's rate-led result, while modular and trench reflect fleet additions, project pipelines, branch expansion and utility work. **Source: DR pp. 9, 28-30, 32.**	MEDIUM
EBITDA margin	Consumer **Not estimated**; B2B storage **40%**; Modular **34%**; Trench **33%**	Consumer storage is not estimated because PODS does not disclose a normalized standalone margin. B2B storage is set near Mobile Mini's disclosed 41% result; modular and trench are lower because installation, engineering and hauling add cost. **Source: DR pp. 9, 28-32.**	MEDIUM
Maintenance capex / revenue	Consumer **Not estimated**; B2B storage **6%**; Modular **8%**; Trench **7%**	Consumer storage is not estimated because PODS's container, delivery and yard sustaining burden is undisclosed. Retained values use long asset lives and residuals for B2B storage, with higher refurbishment and reset needs for modular and trench fleets. **Source: DR pp. 8-10, 22, 24, 28-32.**	MEDIUM
Customer tenor INITIAL / EFFECTIVE	Consumer **1 mo / Not est.**; B2B storage **3 mos / 4 yrs**; Modular **18 mos / 7 yrs**; Trench **2 mos / 5 yrs**	PODS supports a one-month initial term, but its effective tenure is not estimated because churn cohorts are unavailable. B2B storage extends month by month, modular remains through school years or projects, and repeat accounts support longer modeled effective tenure. **Source: DR pp. 28-32.**	MEDIUM
Utilization exposure	Consumer **Not estimated**; B2B storage **Moderate**; Modular **Moderate**; Trench **High**	Consumer storage is not estimated because PODS lacks comparable fleet, yard and route KPIs. B2B storage and modular are Moderate based on disclosed utilization and redeployability; trench is High because inventory rolls off with projects. **Source: DR pp. 8, 10, 18, 20-24, 29-32.**	MEDIUM
New-unit / customer payback	Consumer **Not estimated**; B2B storage **4.5 yrs**; Modular **6.0 yrs**; Trench **3.5 yrs**	Consumer storage is not estimated because acquisition, delivery and logistics contribution is undisclosed. Retained B2B, modular and trench values use General Finance's four-year revenue recovery evidence, then allow for direct cost, maintenance and asset residual value. **Source: DR pp. 15, 17, 29-32.**	MEDIUM
B2B vs B2C	Consumer **Mixed; B2C lean**; B2B storage **Predominantly B2B**; Modular **Predominantly B2B**; Trench **Predominantly B2B**	Consumer storage is mixed with a B2C lean because household moves are a material demand source. Storage, modular and trench customers are principally contractors, companies, schools, institutions, government bodies and utilities. **Source: DR pp. 29-32.**	MEDIUM

Specialty Rental Operating Benchmark

SUBSECTOR CATEGORIES	Consumer moving & storage	B2B portable storage	Modular space	Trench safety rental
	PODS	Mobile Mini / General Finance Corporation	Modulaire Group / McGrath RentCorp	Trench Plate Rental

PODS

CONSUMER MOVING & STORAGE

Evidence. 2m+ long-distance moves and 7m+ deliveries. Q3 2024 sales fell 7.5% and adjusted EBITDA fell 24%. **[DR pp. 3-7]**
Business. Delivers containers for residential and commercial moving/storage.
Economics. **Analyst interpretation.** Unit: container-month plus move event; revenue is rent and logistics fees. Customers solve moves or renovations. PODS runs drivers, yards and linehaul; life-event completion causes churn. Container and delivery assets require capital.

Mobile Mini

B2B PORTABLE STORAGE

Evidence. 2019 standalone: $490.7m Storage revenue, 41.0% margin, 79.1% unit utilization; assets had 30-year lives and 55% residuals. **[DR pp. 7-10]**
Business. Rented storage containers and ground-level offices to commercial users.
Economics. **Analyst interpretation.** Unit: box on rent; revenue was mostly rental. Branches deliver and refurbish simple assets solving temporary jobsite needs. Projects end placements, but accounts repeat. Long lives and residuals limit capital needs.

General Finance Corporation

B2B PORTABLE STORAGE

Evidence. FY2020: $164.7m North America and $63.1m Asia-Pacific leasing revenue. **[DR pp. 14-17]**
Business. Rented containers, mobile offices and modular units through regional brands.
Economics. **Analyst interpretation.** Unit: fleet asset; revenue is lease plus sales. Customers need temporary space. GFC delivered, maintained and re-leased units; projects cause churn, while accounts repeat. Long lives/residuals support capital recovery; mixed assets dilute margins.

Modulaire Group

MODULAR SPACE

Evidence. 330,000 units, 52,000+ customers. 1Q22: EUR370m revenue, EUR116m EBITDA, 86% utilization; capex precision is weaker. **[DR pp. 17-21]**
Business. Rents and installs modular space for public, infrastructure and enterprise users.
Economics. **Analyst interpretation.** Unit: module on rent; revenue is lease/service. Customers need temporary space. Modulaire transports, installs and refurbishes units; installation and repeat projects support retention. Resets and yards raise capital needs versus containers.

McGrath RentCorp

MODULAR SPACE

Evidence. 2025: modular utilization 73.0%, storage 60.8%. Lives/residuals: modular 18 years/50%; storage 25 years/62.5%. **[DR pp. 21-25]**
Business. Rents modular buildings and storage containers to businesses and institutions.
Economics. **Analyst interpretation.** Unit: module/container; revenue is rent plus delivery/service. Customers need classrooms, jobsite space or storage. McGrath installs and refurbishes; repeat accounts outlast placements. Strong residuals limit replacement, though modular resets consume capital.

Trench Plate Rental

TRENCH SAFETY RENTAL

Evidence. Pre-2021 merger: 37 branches and 5,000+ customers. **[DR pp. 10-14]**
Business. Rented trench plates, shoring and safety systems to contractors and utilities.
Economics. **Analyst interpretation.** Unit: jobsite equipment set; revenue is rental/support. Branches solve mandatory excavation safety, then inspect and redeploy steel. Projects end rentals, but contractors repeat. Residual value helps capital recovery; project timing drives utilization.

KEY DILIGENCE QUESTIONS

1. Keep consumer storage, B2B storage, modular space and trench safety separate.
2. Use gross replacement and refurbishment requirements rather than depreciation or net capex.
3. Track physical and dollar utilization with consistent denominators across each fleet.
