

Office of Energy Projects Energy Infrastructure Update *For November 2025*

Natural Gas Highlights

- MountainWest Overthrust received authorization to place in service its Westbound Compression Expansion Project, including the new compressors at its Point of Rocks CS and its Rock Springs CS in Sweetwater County, WY. The project, which also includes a new interconnect with Kern River, a short lateral, and other facilities, and will provide up to 325 MMcf/d of firm transportation capacity to a new delivery point near its Roberson Compressor.
- National Fuel received authorization for its Shippingport Lateral Project, including a 7.26-mile pipeline lateral and a new interconnect in Beaver and Mercer Counties, PA. The project would provide up to 205 MMcf/d of firm transportation capacity for a power generator.
- Eastern Gas Transmission and Storage received authorization for its Capital Area Project, which includes installing 22,240 HP of new compression at three existing compressor stations in Centre and Franklin Counties, PA and Loudon County, VA, and related upgrades in Clinton County, PA. The project would provide up to 67.5 MMcf/d of transportation service for Washington Gas.
- Kinetica Energy received authorization to abandon by sale to Crescent Louisiana Midstream, its 24.37-mile 526A-200 line located Offshore Louisiana. Kinetica has no firm customers on the line and has not provided transportation services in the past 12 months. Crescent plans to convert the line to crude oil transportation.
- Florida Gas Transmission received authorization for its Tampa South Tap & Brandon Tap MAOP Reduction Project at the delivery laterals located on FGT's existing Tampa South Lateral in Hillsborough County, FL. The project would maintain compliance with PHMSA regulations and provide more efficient operations.
- Florida Gas received authorization for its South Central Louisiana Project, including uprating one compressor and rewheeling three others at CS 7.5, and installing a 15,900 compressor at CS 8 in Landry and Baton Rouge Parishes, LA, respectively. The project would provide up to 75 MMcf/d of transportation capacity to power generators and LDCs in the Southeast.
- Portland General, B-R Pipeline, and KB Pipeline received authorization to abandon by sale to Northwest Pipeline their Kelso-Beaver Pipeline, which transports gas from Cowlitz County, WA to Columbia County, OR. Northwest also requests authorization for its KB Reliability Project, including constructing the KB Compression Station, with a 5,500 HP compressor in Cowlitz County. The Project would create 52.4 MMcf/d of incremental westbound and 131 MMcf/d of eastbound transportation service and provide injection and withdrawal capacity for the North Mist Storage.
- Southern Natural received authorization to relocate a pressure regulator in order to reduce the MAOP of its Chattanooga-Rome-Calhoun Crossover Pipeline in Gordon County, GA, from 1,200 to 500 psig. The project would better align delivery pressure with customer requirements.
- Distrigas of Massachusetts Section 3 authorization for its LNG import terminal in Everett, MA was amended, so it may incorporate equipment and controls that would allow it to install a redundant BOG compressor. The project would minimize excess boil-off gas venting and provide redundancy.
- Northwest Pipeline requests authorization for its Ryckman Creek Loop Project, including installing 6.75 miles of looping pipe, modifying the Kemmerer 98-4 Valve Site and the Spire Double D MS. The project, in Uinta County, WY, would add 30.2 MMcf/d of firm transportation capacity for two customers.
- Columbia Gas requests authorization for its NKY Gate Enhancement Project, including abandoning by and replacing 30.56 miles of pipe and modifying related above ground facilities. The project, in Bracken, Pendleton, Nicholas and Cambell Counties, KY, and Hamilton County, OH, will replace and enhance ageing facilities.
- Texas Eastern requests authorization for its Kosciusko Compressor Station Replacement Project, which consists of abandoning and removing 14 compressor units at its Kosciusko CS in Attala County, MS, and replacing them with three more efficient, reliable, and lower emitting units. The project would increase total compression by 2,500 HP.
- Columbia Gas requests authorization for its Maysville Project, which includes 42-miles of new pipe and associated facilities. The project, in Rowan, Fleming, and Mason Counties, KY, would provide up to 340 MMcf/d of firm transportation capacity for a power cooperative.
- Florida Gas requests authorization for its South Central Alabama Project, including constructing of a total of 3.37 miles of pipeline looping, two taps, and relocating two pig launchers in Greene County, MS, Mobile and Escambia Counties, AL, and Santa Rosa County, FL. The project would provide up to 145 MMcf/d of firm transportation capacity for electric generators and LDCs in the region.
- Rockies Express requests authorization for its Switchgrass Interconnect Project, which includes a new interconnect at REX's Cheyenne Hub, 7.2 miles of pipe, and a new meter station. The project, in Weld and Laramie Counties, WY, would provide 419 MMcf/d of firm transportation capacity for two customers.

Office of Energy Projects Energy Infrastructure Update *For November 2025*

- Florida Gas requests authorization for its SE Hialeah MAOP Reduction Project in Miami-Dade County, FL. The project would lower the MAOP of the line from 866 to 824 psig and would maintain compliance with PHMSA's regulations without impacting service to customers.
- Enable Mississippi River Transmission requests authorization for its Ameren-EMRT Castle Bluff Project, including abandoning in place 1.15 miles of pipe and replacing it with 1.57 miles of pipe, installing a pig launcher/receiver, a new M&R station, and a hot tap, all in Jefferson, Missouri, and St. Louis Counties, MO. The project would provide up to 188 MMcf/d of transportation capacity for electric generators.
- Florida Gas requests authorization for its West Palm Beach MAOP Reduction Project, consisting of permanently reducing the MAOP on its West Palm Beach, FL delivery facilities from 975 to 866 psig. The project would maintain compliance with PHMSA's regulations without impacting service to customers.
- Columbia Gas requests authorization for its Southeast Virginia Energy Storage Project, including construction of one 1.3 BCF LNG storage tank, liquefaction and vaporization systems, 1.1-mile bi-directional pipe, and other facilities. The project, in Sussex County, VA, would provide 1.1 BCF of commercial storage capacity and up to 120 MMcf/d of deliverability for Virginia Natural Gas.
- National Fuel requests authorization to plug and abandon Well 4985 and associated pipe at its Belmouth Storage Field in Elk County, PA. The well contains localized corrosion and the abandonment would not impact service to customers.
- Saltville Gas Storage requests authorization to plug and abandon I/W Well EH 90 at its Early Grove natural gas storage facility in Scott County, VA. The abandonment would eliminate potential operational, safety and environmental concerns, and would not affect service to customers.
- Columbia Gas requests authorization to abandon its operations and facilities, including 96 wells, associated pipelines and appurtenances, and a compressor station at the Hunt Storage field in Kanawha County, WV. The project would align with PHMSA's Storage Final Rule, and the facilities are no longer needed to meet firm service obligations.
- Plaquemines Expansion requests authorization to construct, adjacent to its Plaquemines LNG terminal in Plaquemines Parish, LA, a new liquefaction facility consisting of 16 liquefaction blocks and related infrastructure, capable of producing 4.45 Bcf/d of LNG at peak capacity. The Expansion Project would share LNG storage tanks, marine berths and other facilities with the existing terminal.
- Rio Grande LNG requests authorization to increase the peak capacity at its under-construction LNG export terminal in Brownsville, TX by 0.09 Bcf/d. The increase better aligns authorized capacity with the actual output of the terminal.

Office of Energy Projects Energy Infrastructure Update *For November 2025*

Office of Energy Projects Energy Infrastructure Update *For November 2025*

Hydropower Highlights (nonfederal)

- Georgia Power Company was issued an order increasing the capacity of its North Georgia Project No. 2354 from 192.876 to 194.376 MW. The project is located on the Tallulah, Chatooga, and Tugalo Rivers in Rabun, Habersham, and Stephens Counties, GA, and Oconee County, SC.

Office of Energy Projects Energy Infrastructure Update *For November 2025*

Electric Generation Highlights

- Omaha Public Power District's 161.5 MW natural gas fired Standing Bear Lake Project in Douglas County, NE is online.
- Arizona Public Service Co's 121.0 MW natural gas fired Sundance (AZ) Expansion Project in Pinal County, AZ is online.
- Monte Cristo Windpower LLC's 234.5 MW Monte Cristo Wind Project in Hidalgo County, TX is online.
- Willow Creek Wind LLC (OK)'s 220.0 MW Willow Creek Wind (OK) Project in Noble County, OK is online.
- Apex Clean Energy Inc's 200.0 MW Bowman Wind Project in Bowman County, ND is online.
- Hart Wind Project LLC's 163.4 MW Hart Wind Project in Castro County, TX is online.
- Parliament Solar LLC's 484.6 MW Parliament Solar Project in Waller County, TX is online.
- Stampede Solar Project LLC's 256.3 MW Stampede Solar & Storage Expansion Project in Hopkins County, TX is online. The power generated is sold to Nestle USA under long-term contract.
- Stillhouse Solar LLC's 210.8 MW OCI Stillhouse Solar Project in Bell County, TX is online.
- Stoneridge Solar LLC's 201.6 MW Stoneridge Solar & Storage Project in Milam County, TX is online.
- New Madrid Solar LLC's 200.0 MW New Madrid Solar Project in New Madrid County, MO is online.
- Tilden Solar LLC's 182.0 MW Tilden Solar Project in Randolph County, IL is online.
- Azalea Springs Solar Park LLC's 181.0 MW Azalea Springs Solar Project in Angelina County, TX is online.
- Oriana Solar LLC's 181.0 MW Oriana Solar Project in Victoria County, TX is online.
- Pleasantville Solar Park LLC's 150.0 MW Pleasantville Solar Park in Fulton County, IL is online.
- White Tail Solar LLC's 140.0 MW White Tail Solar Project in Washtenaw County, MI is online.
- Terra Gen Power LLC's 102.0 MW solar powered Edwards & Sanborn Expansion Project in Kern County, CA is online.
- Swift Air Solar II LLC's 100.0 MW Swift Air Solar II & III Project in Ector County, TX is online.
- Swift Air Solar III LLC's 100.0 MW Swift Air Solar II & III Project in Ector County, TX is online.
- American Beech Solar LLC's 80.0 MW American Beech Solar Project in Halifax County, NC is online.
- Duke Energy Florida's 74.9 MW Half Moon Solar (FL) Project in Sumter County, FL is online.
- Duke Energy Florida's 74.9 MW Rattler Solar Park in Hernando County, FL is online.
- EdSan 1B Group 1 Sanborn LLC's 46.0 MW solar powered Edwards & Sanborn Expansion Project in Kern County, CA is online.
- Blue Elk Solar I LLC's 20.0 MW Blue Elk Solar I Project in Lenawee County, MI is online.
- Dominion Energy Inc's 20.0 MW North Ridge Solar Project in Powhatan County, VA is online.
- BCE Seal Beach LLC's 12.0 MW solar powered BCE Seal Beach Project in Orange County, CA is online.
- Todays Power Inc's 10.0 MW solar powered Clarksville (City of) Project in Johnson County, AR is online.
- Beecher Solar 1 LLC's 5.0 MW Beecher Solar 1 Project in Will County, IL is online.
- Dimension Energy Co LLC's 5.0 MW South Belleville Solar Project in Saint Clair County, IL is online.
- EDPRNA DG Westmoreland Solar LLC's 5.0 MW solar powered NY Citizens Westmoreland Project in Oneida County, NY is online.
- Nexus NSF Solar Investco LLC's 5.0 MW solar powered Nexus NSF Marshall 1 Project in Oneida County, NY is online.
- Nexus NSF Solar Investco LLC's 5.0 MW solar powered Nexus NSF Marshall 2 Project in Oneida County, NY is online.
- USS Ducks Solar LLC's 5.0 MW USS Ducks Solar Project in Ogle County, IL is online. The power generated is sold to Commonwealth Edison Co under long-term contract.
