

Submetering Operating Benchmark

SUBVERTICAL LENS

Building billing platforms and meter-asset owners are economically distinct. Billing platforms earn recurring data and compliance fees with moderate reinvestment; meter owners report higher EBITDA but require materially heavier replacement capital and longer payback.

METRIC	ESTIMATE	ASSERTION	CONFIDENCE
Revenue growth	Building 6% Meter owner 7%	The 6% building-platform estimate is anchored near ista's 5.2% growth and normalizes Techem's stronger result. The 7% meter-owner estimate is deliberately below SMS's 13% ILARR growth because funded rollout and acquisitions inflated reported rates.	MEDIUM
EBITDA margin	Building 47% Meter owner 60%	The 47% building estimate uses Techem's roughly 48% group-level margin and ista's 40%-plus evidence; Techem's submetering revenue is disclosed separately, so this is a normalized proxy rather than a segment margin. The 60% meter-owner estimate sits between SMS and Calisen.	MEDIUM
Maintenance capex / revenue	Building 9% Meter owner 30%	The 9% building-platform estimate reflects device, battery, communications and IT refresh. The 30% meter-owner estimate reflects the heavier replacement capital required by owned estates; rollout and growth capital are not cleanly separated from sustaining spend.	MEDIUM-LOW
Customer tenor INITIAL / EFFECTIVE	Building 8 / 14 yrs Meter owner 3 / 13 yrs	These are modeled terms, not disclosed weighted-average cohorts. Building installation and data migration support an 8-year initial and 14-year effective relationship; meter-owner legal forms can be short, while compensation can survive supplier switching for roughly 13 years.	MEDIUM-LOW
Utilization exposure	Building Low Meter owner Moderate	Building-platform exposure is Low because installed meters continue earning regardless of daily consumption. Meter-owner exposure is Moderate because installation throughput, supplier rollout decisions, meter removals and field-team productivity still matter.	MEDIUM
New-unit / customer payback	Building 4.0 yrs Meter owner 6.0 yrs	The modeled four-year building estimate centers the lower-cost device, billing and data cases. The modeled six-year meter-owner estimate is bounded by disclosed meter capex and annual rent evidence across SMS and Calisen.	MEDIUM-LOW
B2B vs B2C	Building B2B; residential end users Meter owner Predominantly B2B	Building owners and managers contract for submetering even when residents consume the utility and receive bills. Meter owners contract with energy suppliers or retailers, making both archetypes economically B2B.	HIGH

SUBSECTOR CATEGORIES

Building submetering & billing
ista / Techem / CARMA

Meter asset ownership
Smart Metering Systems / Calisen

Mixed metering & utility services
Energy Assets

ista

BUILDING SUBMETERING & BILLING

Reference data. 2025 sales were EUR1,279.0 million versus EUR1,216.1 million, up 5.2%; EBITDA margin evidence was above 40%. Total investment was EUR260 million, or 20.3% of sales, and S&P cited total capex at 12%-15% of revenue; neither measure is sustaining capex.

Business. European platform installing apartment meters and allocators, then providing recurring consumption allocation, billing, data, and sustainability workflows to owners and managers.

Economics. Unit: managed dwelling/device footprint. Regulation-shaped demand and dense estates support margin; access, hardware, resident communication, and data migration deter switching.

Techem

BUILDING SUBMETERING & BILLING

Reference data. 2025 submetering revenue was EUR1,041.5 million versus EUR933.5 million, up 11.6%; adjusted EBITDA was EUR557 million on EUR1,173.4 million group revenue, or 47.5%. Fitch expected about EUR190 million of annual capex in 2023-2025, roughly 16% of 2025 group revenue.

Business. European provider installing apartment devices and monetizing recurring heating/water allocation, billing, data, and digital building services for owners and managers.

Economics. Unit: serviced dwelling/device set. Regulation-shaped demand, radio infrastructure, and embedded billing deter switching; field service and procurement remain costs.

CARMA

BUILDING SUBMETERING & BILLING

Reference data. CARMA meters 135,000-plus units in 1,000-plus buildings under long-term inflation-protected contracts and processes 11 million-plus daily reads; revenue, EBITDA, capex and churn are undisclosed.

Business. Canadian suite-level metering and billing platform helping owners and managers allocate utilities, provide consumption visibility, and administer resident accounts.

Economics. Unit: contracted metered suite. Devices, data, billing, and move workflows likely deter switching; property decisions or service failures are plausible churn vectors. Capital funds meters, communications, IT, and reinstallation.

Smart Metering Systems

METER ASSET OWNERSHIP

Reference data. FY2022 ILARR rose 13% to GBP97.1 million; pre-exceptional EBITDA was GBP63.8 million on GBP135.5 million revenue, or 47.1%. SMS installed 480,000 meters; its 2.17 million-meter pipeline implied about GBP50 million ILARR, or GBP23 per meter annually. Sustaining capex is undisclosed.

Business. UK platform funding, installing, and managing supplier-facing smart meters for recurring rent and data income; batteries and EV-charging are excluded.

Economics. Unit: owned contracted meter. Ownership and workflow integration support tenure; rollout and supplier procurement drive growth and service utilization. Hardware-plus-installation makes replacement capital heavy.

Calisen

METER ASSET OWNERSHIP

Reference data. 2023 MAP revenue: GBP293.9m vs GBP236.2m; smart meters: 12.0m vs 8.2m. Group EBITDA/revenue: GBP265.4m/GBP358.2m (74.1%). Total capex: GBP355.5m; meter depreciation: GBP144.8m; capex/rent per meter: GBP219/GBP23.8 annually. Retailer orders: month-to-month; arrangements: 15 years; meter lives: 10-20 years.

Business. UK asset owner funding meters for energy retailers; the benchmark centers on MAP Services and excludes EV charging, heat pumps, and other transition activities.

Economics. Unit: owned revenue-generating meter. Policy drives installs; charges can survive supplier switching.

Energy Assets

MIXED METERING & UTILITY SERVICES

Reference data. Energy Assets manages more than 1.5 million assets. Clean segment revenue, EBITDA, sustaining capex, churn and contract-term disclosures are unavailable, so its company data do not anchor the numerical estimates.

Business. UK metering-and-data provider inside a wider network construction, ownership, water, fibre, and utility-services platform; customers need compliant metering, data, and field service.

Economics. Unit: installed asset with attached data/service. The offering spans recurring metering/data, installation, exchanges, and maintenance; public sources do not quantify revenue mix.
